

Gan Tools and Components

Design,Prototype,Innovate,Manufacture.

From concept to mass production, GT&C turns ideas into reliable plastic components with precision moulding and 25+ years of engineering expertise

Our Services

- Designing of product
- Prototyping
- Precision mould making
- Injection moulding
 - materials - Abs,Pc,Pmma,Ultum,Nylon 6 etc
 - colours can be customized, UV resistant , high melt point (fire retardent), high hardness materials can be used.
 - max size - 500*600*150 mm , 600g
 - All electric machines available (oil not used so no chance of slightest oil contamination)
- Ultrasonic Welding
 - capacity 20kHz,1200W
- Assembling
 - complete assembly including IP wash ,labelling,packing (ready for sale)
- Printing on plastic
- CNC machining
 - CNC lathe,VMC available

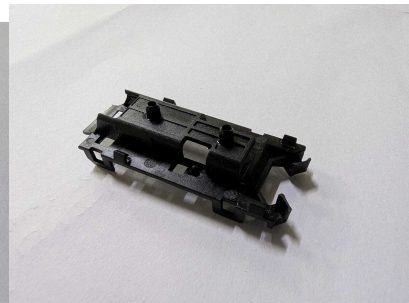

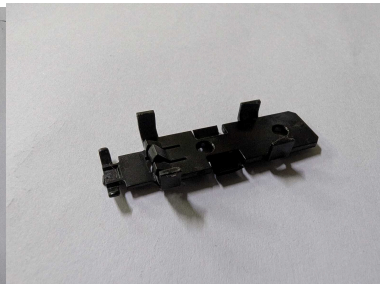

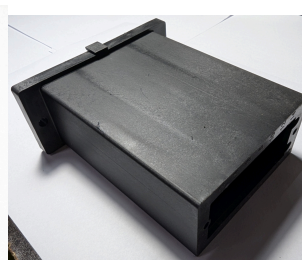

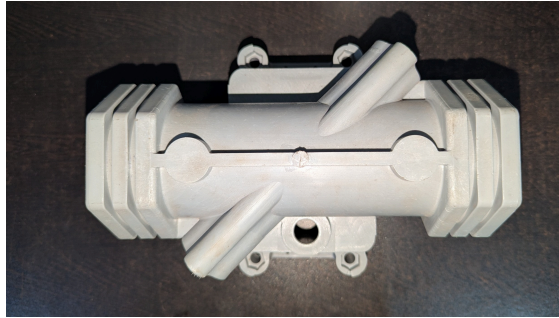

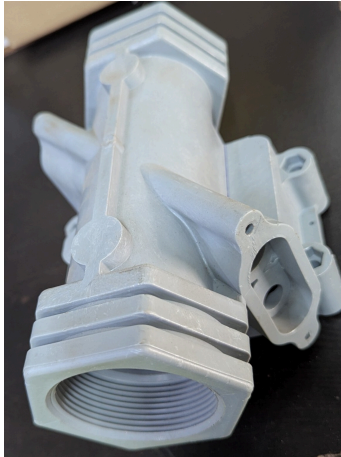

Why Us?

- 25+ Years of Expertise
- In-house tool design and production - minimised downtime
- Hot runner technology - minimise wastage
- Strip ejection technology - remove ejection marks
- Ultrasonic welding technology - weld plastic on plastic
- New technologies adopted regularly
- Have customers returning to us 20 years later
